

Oxidair™
Thermal Oxidizers

EPG's Oxidair™ thermal oxidizers are specifically designed for soil remediation, off-gas treatment, and industrial applications. A unique multi-jet burner design provides intimate mixing of fumes, air and fuel resulting in contaminant destruction rates exceeding 99+%. Typical fuel savings are 30% over competitive thermal oxidizers. Available options include:

- ◆ Vapor extraction packages
- ◆ Condensate separators
- ◆ Catalytic modules
- ◆ Skid or trailer mounted units
- ◆ Various rental, lease, and purchase programs are available
