

our Vertical Pumps Stand Up!

EPG SurePump™ is available with or without integrated level sensor

Suitable for:
Landfill Gas Well Dewatering
Leachate Collection
Gas Condensate Removal
Contaminated Liquids Recovery
Other Aggressive Environments

EPG Companies Inc. specializes in the manufacture of **landfill leachate pumps & controls, gas condensate pumps, remediation equipment, telemetry hardware and SCADA systems** and other environmental and industrial products.

Greetings!

EPG is exhibiting at the SWANA FL 2012 Summer Conference in Ponte Vedra Beach, Florida June 24-26.

Stop and say hello to Chris Riddle (EPG Applications Specialist) and Ray Rivera of Diamond Systems at the EPG booth (#38).

Chris will also be presenting a paper Monday afternoon - "Using Electric Submersible Pumps and Controls in Landfill Gas Systems".

The SWANA Florida Sunshine Chapter has served it's members since 1978. Their focus centers around professional training, annual conferences and training courses.

Learn more at their website: www.swanafl.org

Our Vertical Pumps Stand Up!

EPG's SurePump™ Vertical Sump Drainer pumps are suitable for applications ranging from landfill gas well dewatering and leachate collection to contaminated liquids recovery, gas condensate removal, and sampling applications. They can be used in most aggressive environments. Other designs may fail while EPG Vertical Sump Drainers are still going strong. Paired with our UL Listed Control Panels, these pumps will provide consistent, dependable, long term service.

The EPG VSDCPT pictured here incorporates a center bottom positioned level sensor to accommodate smaller diameter bore holes and wells.

- Stainless steel construction
- Corrosion resistant
- E-Glide™ bearings and seals for extra durability
- Special Franklin Electric motors
- Sealed unit with liquid flow drawn past motor for cooling
- Facilitates draw-down to the very bottom of the sump or well
- Chemical resistant, jacketed, no-splice, CP motor leads
- Vent valve system to prevent pump air lock
- Flow rates available from 2 - 1,200 GPM

VSDCPT

***EPG's use of high quality materials in our pump ends like our exclusive E-Glide™ bearings and seals provide for a more cost effective pumping solution. They assure superior performance and longer life over less expensive water well pumps typically used in most competitor products.**

Based on meeting NEC criteria, manufacturing design and service/performance records, EPG pumps have been proven to be suitable for Class I, Division 1 & 2 locations.

Let EPG show you, first hand, the effect vacuum and pressure caused by landfill gas can have on the accuracy of a level sensor / pressure transducer.

Our Landfill Gas Affect demonstration can be seen at these upcoming industry events:

SWANA FL Summer Conf. - Ponte Vedra Beach, FL (6/24-26)
WASTECON 2012 - Washington, D.C. (8/14-16)

Call **1-800-443-7426** or email info1@epgco.com for more information.

Diamond Systems

EPG would like to introduce you to **Diamond Systems** of Florida. **Ramon (Ray) Rivera** and his company **Diamond Systems** have represented EPG in the southeast United States (FL, AL, Puerto Rico) since 2009 and now cover Georgia as well.

[Diamond Systems Website](#)

Not only is Diamond Systems your best source for landfill pumps, controls, and monitoring solutions in Florida, Georgia, Alabama and Puerto Rico, they also specialize in the following environmental products and services:

- Geomembranes
- Erosion Protection
- Groundwater Well Applications
- In Situ & Ex Situ Soil and Sludge Remediation
- Landfill Methane Gas Applications
- Permeable Reactive Barrier (PRB) Technology
- Sealable Steel Sheet Pile
- Wheel Wash Systems
- Water Systems
- and more.

Be sure to contact them for the very best in pumps & controls for your next landfill project in the Southeast United States. Visit www.landfillcontractor.com to learn more about the other products and services they offer.
